At the conclusion of this session, the participant should be able to:

- Describe the multifaceted nature of nanotechnology and implications for the practice of medicine
- Begin to apply the methods of technology assessment to anticipate the existing and possible challenges raised by biomedical nanotechnology
- Discuss the historical goals of medicine in light of the potential use of biomedical nanotechnologies for human re-engineering projects
- Apply the principles of justice in evaluating the development and uses of biomedical nanotechnologies

Intended audience:
All physicians, residents, ethics committee members, patient care staff, nurses, social workers, clergy and healthcare experts from the academic community

The Bioethics Seminar Series is chaired by Robert Cranston, MD.
